Please provide additional comments about the TAs below. Feel free to refer to TA(s) by name:

Both Jeremy and Somya are great TAs. They response timely and are able to provide clear and detailed solutions, and extend the knowledge by connecting the points together.

TA sessions are helpful.

They are awesome

Very grateful for Jeremy and Somya. They were always available. Somya was so helpful at the FINM building talking about the lecture material and the context of it all. Jeremy is an expert coder in Python and I will continue to watch his videos even after this course

they were helpful, when needed.

The TAs for this class are probably the best I ever had in my entire life (bachelors and masters). THANK YOU JEREMY AND SOMYA.

They did really good job helping me learn coding in Python.

The TAs, Jeremy and Somya, were excellent. They were approachable, helpful and well-versed in the topics.

thanks

Both Jeremy and Somya are really willing to help.

both jeremy and somya are good

TAs are good.

Great.

TA is good

Somya and Jeremy are really helpful

They were all very good

Both TA are very helpful in answering my questions

The Indian TA is really helpful and nice at his office hour.

Very responsible

TA sessions are extremely helpful.

The two TAs are really helpful

helpful

Thanks for all the help.

The TAs are quite good. They held on time meetings every week. The content of review and addition sessions are very useful and I do learn a lot from Jeremy, Somya and Roh. Thanks for their help, I can feel better about this course.

TA is excellent in general.

Not a lot of questions for the course but basically the questions I got can all be well solved. I like them.

I really appreciated the help from Somya, he replied to my questions very fast and in detail in critical times, and hosted length office hour with patience even the day before his own exam.

Best take this quarter

TA for this course are helpful and knowledgeable
